

ELECTRIFICATION & EFFICIENCY PRODUCTS

Version date: November, 2025

Since 1985, Tri-State has partnered with distribution members to promote the wise use of electricity, energy efficiency and implementation of new electric technologies. Today, Tri-State and the distribution members continue to promote electrification to increase efficiency and productivity, create sustainable load growth, reduce carbon emissions, and enhance safety.

This document is intended to provide the end consumer information related to potential rebate incentives. Product eligibility and rebate incentives are subject to change, please contact your local Cooperative or Public Power District to verify program participation and application requirements before making any purchases or applying for incentives. Receipts are required for most rebate incentives and must clearly show detailed product make and model information, associated labor costs, consumer name, date and verification of purchase/payment. The installation or purchase of used and/or refurbished equipment is not eligible for any rebate incentives under the program.

PRODUCT	SPECIFICATIONS & REQUIREMENTS	INCENTIVE OVERVIEW
RESIDENTIAL & SMALL COMMERCIAL		
Electric appliances and recycling	<ul style="list-style-type: none"> Eligible new appliances include: clothes dryers and induction cooktops Clothes dryers must be ENERGY STAR® certified Induction cooktops must have minimum surface width of 30 inches to qualify Eligible appliance recycling include: refrigerators and freezers, maximum 2 units per year per member account 	<ul style="list-style-type: none"> \$30/electric resistance clothes dryer \$90/electric heat-pump clothes dryer (a.k.a. ventless) \$60/refrigerator or freezer recycle (max \$120 per member account per year) \$350/induction cooktop in new construction \$350/induction cooktop replacing propane or natural gas (requires photo of old cooktop) \$100/induction cooktop replacing electric
Smart thermostat	<ul style="list-style-type: none"> Thermostat must be installed at member consumer account Limit of 2 thermostats per member account for standard/low-voltage applications Limit of 5 thermostats per member account for line-voltage applications Standard/low-voltage thermostats must be ENERGY STAR® certified 	<ul style="list-style-type: none"> \$25/thermostat \$50/thermostat if enrolled in a managed program Managed programs include member system led demand response control or time of use retail electric rate
Whole house fan	<ul style="list-style-type: none"> Replacement or new installations Attic ventilation systems do not qualify Limit 2 per member account 	<ul style="list-style-type: none"> \$100/unit
Evaporative cooling	<ul style="list-style-type: none"> Replacement or new installations Minimum airflow of 2,500 CFM Permanent installations only, no portable or window units Limit 2 per member account 	<ul style="list-style-type: none"> \$200/unit
Electric resistance and heat-pump water heaters	<ul style="list-style-type: none"> 30 gallon minimum size requirement Electric resistance units must meet one of the following: <ul style="list-style-type: none"> Replacing propane or natural gas \$50/unit for demand-response capable or member-managed water heater program New construction Heat-pump water heaters must be ENERGY STAR® certified 	<ul style="list-style-type: none"> Electric resistance water heater rebates: \$50/unit when replacing propane or natural gas water heater \$50/unit for demand-response capable or member-managed water heater \$30/unit for new construction \$350/unit for air source heat pump water heaters
Electric thermal storage and slab	<ul style="list-style-type: none"> Minimum qualifying load for ETS is 1kW 	<ul style="list-style-type: none"> \$16/kW for ETS units controlled by timers or master control system \$12/kW for thermal slabs controlled by timers or master control system

Electrify and Save® (E&S) Eligibility Notes

1) All rebates are limited to one per account per year unless noted otherwise. 2) All rebate values are based, in part, on associated product cost incurred by the member consumer. A discounted product can result in a reduced rebate. Free products are ineligible for rebate. 3) The installation or purchase of used and/or refurbished equipment is not eligible for any rebate incentive. 4) E&S rebates are for completed purchases or installed projects and require paid receipts along with other documentation requested on application. 5) Participating CO-OPs or PPDs may place restrictions on any product, please confirm participation with your provider.

PRODUCT	SPECIFICATIONS & REQUIREMENTS	INCENTIVE OVERVIEW
RESIDENTIAL & SMALL COMMERCIAL		
Electric heat pump: Air-source (ducted, ductless & radiant)	<ul style="list-style-type: none"> Minimum eligibility (Ducted and Ductless): ENERGY STAR® version 6.1, minimum standard 7.8 HSPF2 Incentive amount is the lower of stated rebate or 50% of equipment cost AHRI certification and/or number required 	<ul style="list-style-type: none"> \$500 for systems equal to or less than 1.5 tons (18,000 BTUs) \$1,500 for systems greater than 1.5 tons (18,000 BTUs) \$500 bonus for ducted systems with propane or natural gas back-up heating (back-up heating system must be capable of conditioning a minimum of 50% of home or building space when outdoor temperature is 17 degrees Fahrenheit) All air-to-water radiant systems: \$500/ton
Electric heat pump: Ground-source	<ul style="list-style-type: none"> New ground source heat pump systems and replacement heat pumps are eligible AHRI certification and/or number required 	<ul style="list-style-type: none"> \$500/ton for new installations \$250/ton for existing unit replacement
Electric vehicle chargers	<ul style="list-style-type: none"> All equipment and installation costs are required to be submitted on one application One rebate per installed charger; multiple charge ports do not qualify for multiple rebates Managed charger programs include member system led demand response control or time of use electric rate Photo of installed EVSE equipment and circuit in service panel required To be eligible for the electrical installation portion of the rebate requires use of and receipt from an electrician 	<ul style="list-style-type: none"> Level 2 (L2) – No retail sale or fee collection capability Up to 50% of installed cost maximum of \$250 (rebate maximum split up to \$125 for charger and up to \$125 for electric service) for non-managed chargers Up to 50% of installed cost maximum of \$1,000 (rebate maximum split up to \$500 for charger and up to \$500 for electric service) for managed chargers DCFC and L2 – Retail sale or fee collection capable 50% of total equipment and installation costs up to \$1000 for L2 50% of total equipment and installation costs up to \$3000 for DCFC rated between 50–75 kW 50% of total equipment and installation costs up to \$5000 for DCFC rated between 76–149 kW 50% of total equipment and installation costs up to \$7500 for DCFC rated 150 kW & above
Outdoor power equipment electrification	<ul style="list-style-type: none"> Battery and corded electric equipment only Members limited to one rebate per product except e-bikes An aggregated maximum rebate of \$300 per member account excludes riding lawn mowers All eligible equipment is listed to the right; if the rebate is not listed, equipment is not eligible for rebate 	<ul style="list-style-type: none"> 25% of cost up to \$1000 for riding mower 25% of cost up to \$250 for 2-stage snow blower 25% of cost up to \$150 for snow blowers, walk-behind mowers and e-bikes 25% of cost up to \$100 for chainsaws 25% of cost up to \$50 for trimmers, leaf blowers & power washers 50% cost up to \$25 for addt'l. batteries with original purchase/application (limit 1 addt'l. battery per product)
